

# 2024 DID Safety Initiatives

In 2024, the Mpls DID is committed to continuing to support public safety and community outreach downtown through a holistic approach. This year, we will allocate more than \$3 million to community-wide public safety efforts and partnerships. This commitment highlights the DID's core mission as an organization while also implementing multi-faceted approaches to meet downtown's public safety, community outreach and livability needs for the 120 block area within our District.

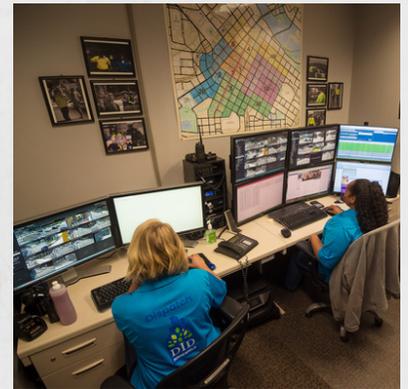

## SAFETY COMMUNICATIONS

### DID Safety Communications Center

Mpls DID's Safety Communications Center, located within the Minneapolis Police Department's 1st Precinct, serves as a downtown safety information hub. Dispatch Ambassadors work inside the DID Safety Communications Center 365 days a year, responding to pedestrian requests from Ambassadors on the street, communicating with outreach services for people in need, monitoring public area cameras and collaborating with private security.
