

ELECTROLYZED WATER

Non-toxic, environmentally friendly cleaning solution used throughout event activity

BI-POLAR IONIZATION

Used in the majority of meeting rooms to reduce airborne particles & contaminants

MERV 13 FILTRATION

High-efficiency filters that capture fine particles in select meeting rooms

ELECTROSTATIC DISINFECTION

Provides enhanced surface sanitation throughout the facility

➤ CLEANING IN ACTION

Enhanced cleaning protocols keep high-traffic and high-touch areas event-ready throughout the day.

- High-touch areas including door handles, countertops, seating, tables, escalators, elevators, restrooms and entrances/exits receive regular attention throughout the day.
- Meeting rooms and event spaces receive nightly cleaning and sanitation.
- Customized cleaning and facility care needs can be coordinated to support your event.
- Cleaning protocols are continuously adapted to meet the needs of the facility and its events.

➤ TRAINED & COMMITTED TEAM

Trained professionals help maintain MCC's high standards of cleanliness throughout every event.

- Accredited GBAC STAR™ Facility.
- Team members are trained in industry-recognized cleaning, sanitation and facility care standards.
- Team members follow established protocols for maintaining cleanliness throughout the facility.
- Our team works alongside event organizers to accommodate customized cleaning needs.

➤ QUALITY & MONITORING

Continuous evaluation helps us maintain high standards.

- Cleaning procedures are routinely tracked, evaluated and refined to support consistent facility standards.
- Routine ATP Hygiene Monitoring provides an additional measure of cleaning effectiveness and quality assurance.
- Facility care practices are reviewed regularly to identify opportunities for improvement.
